MBRG is a 31-year-old statewide, nonpartisan political research and education organization supported by corporations, trade associations, chambers of commerce, and individuals. Its purpose is to inform Maryland's business community, elected officials, and the general public about the political and economic environment needed to foster economic development and job creation in Maryland. Annual evaluations of the voting records of Maryland's state and federal legislators enable MBRG and its members to hold politicians accountable for the state's economic well-being like no other organization.
